PROTECT GROUND & MAINTENANCE CREWS, EQUIPMENT, AND FACILITIES FROM SEVERE WEATHER

Weather impacts airport operations every day. Get ahead of the storm with advanced weather tracking, alerting, and forecasting solutions.

OVERVIEW
Get safely off the ground with Earth Networks. We support safe ground operations from the tarmac to the maintenance hangar with:

- Outdoor lightning siren and strobes
- Multi-channel severe weather alerts
- Automated countdown clocks
- Weather-tracking dashboard
- Fully-staffed team of meteorologists
- Custom forecasts and threat assessments

BENEFITS

- Minimize downtime and delays with automated alerts and all-clears to keep operations running smoothly
- Get ahead of icing events with weather tracking and alerting that let you know to start de-icing procedures
- Prepare for diversions by keeping an eye on the weather threats impacting nearby airports
- Meet staffing needs when weather delays lead to crew time-outs and a backlog of work
KEY FEATURES:

- Real-time lightning detection and alerting
- Dangerous Thunderstorm Alerts (DTAs)
- Storm “estimated time of arrival”

WE SUPPORT:

- Airlines
- Air traffic controllers
- Fixed base operators
- Small and mid-sized airports
- Large hub airports
- Port authorities
- Public and private airports
- Regional aviation authorities

REAL-TIME LIGHTNING AND WEATHER TRACKING

Keep track of lightning activity near your airport with the Earth Networks Total Lightning Network® - the most reliable and precise lightning detection network in the world. Set up fast, accurate, and automated lightning proximity alerts and track storm activity from your custom weather dashboard.

WEATHER TRACKING WITH SFERIC MAPS

Track storms headed your way with Sferic Maps. View the storm estimated time of arrival along with forecast and animated radar and real-time lightning strikes.
